CROSSFIRE X2

200cc ATV

IMAGES

DESCRIPTION

The Crossfire X2 atv is our newest member in the hobby farm arena. The machine will be great for the care taker and as an allrounder.

The X2 has a trailer hitch and will take most small garden trailers with ease.

Crossfire X2 quad bike is fully automatic with forward and reverse. The CVT gear box is seamless and constantly adjusting for power when needed and fuel economy when just moving about the land.

"..The machine will be great for the care taker and as an allrounder..."

The 2018 variant features Hydraulic disc brakes both in front and rear. The digital display will keep speed and distance travelled in check as well telling you what gear the quad is in.
