CROSSFIRE ROVER 125

ATV

The Rover 125 is a larger 125cc ATV featuring independent front suspension with front and rear disc brakes unlike most drum brake machines on the market. This ATV is loads of fun to ride and the seat is well padded meaning the rider stays comfortable for longer.

The ATV is electric start and being 4-stroke will run on regular pump unleaded. The throttle limiter is located on the handle bar and is designed to limit how much the throttle can be depressed.

With 3 speed semi auto gears and reverse there is no need for a clutch as the ATV will auto clutch when gears are changed, and this robust ATV has an impressive 125cc 4 stroke single cylinder petrol engine.

A larger 125cc ATV featuring independent front suspension with front and rear disc brakes.
